KEY PARTNER

THE OFFICIAL REPORT

On the organization and conduct of the V International Congress

"Environmental security in the energy sector. Technologies and equipment for the collection and processing of hydrocarbonaceous wastes".

On June 20, 2017, international Congress *"Ecological safety in the energy industry. Technologies and equipment for the collection and processing of hydrocarbonaceous wastes"* with the approval of the Deputy Chairman of the Government of the Russian Federation will be held in Moscow in the Congress hall of the chamber of Commerce of Russia, Ilyinka street 6.

The organizers are: *Independent Non-profit Organization "International center for promotion of enterprises for processing of oil sludge" (INO "IUEPO")*, publishing house *"InfoTEK"*, *Union of oil and gas producers of Russia*.

Official support: the relevant committees of the state Duma and the Federation Council of Russian Federation, Ministry of natural resources and ecology of the Russian Federation, the Ministry of energy of the Russian Federation, the Russian Academy of Sciences, the Committee on energy policy and energy efficiency RSPP Committee for energy strategy and development of FEC of the CCI of the Russian Federation, Russian state University of oil and gas named after I. M. Gubkin, RUDN University

Ecological safety of Russia is one of the main factors of development in a number of industries at the present stage. **Today, in the "Year of ecology", it is important to consolidate the efforts of energy companies and service companies, relevant ministries and institutions in the framework of professional discussions and an active information campaign aiming at a better understanding of the ever-growing environmental problems and practical implementation of specific measures aimed at their solution.**

There will be the following questions in the focus of the business program of the Congress:

- The analysis of the new state environmental policy in the field of oil and gas production, oil processing and petrochemistry. **(Changes in the Federal law "About environmental protection": a new order of calculation of the rates of payment for negative impact on environment and additional coefficients in 2017.)**

New licensing and registration in the field of waste management I-IV hazard classes. (Order of the Ministry of Natural Resources and Environmental Protection of the Russian Federation № 379 from 01.07.2016)

- Analysis of the new state environmental policy in the field of energy, construction, transport problems (legislative regulation and investment in projects).

The work of roundtables is planned in the following areas in the programmes of of the Congress:

- Modern technical and technological capabilities, economic aspects of the collection and recycling of oil sludge. Cleaning of water bodies and bioremediate land.
- Modern technical and technological possibilities of recycling plastics and rubber products.
- Issues of waste utilization in construction, development of normative documents for the separate collection of municipal solid waste (MSW), waste processing and disposal.
- The investment attractiveness of projects of oil refining, construction, agricultural and other waste categories for financial and investment organizations.

The heads and representatives of the profile ministries and departments, key experts of the branch unions and associations, heads of scientific and public organizations, heads of industrial enterprises and organizations, representatives of the business community, financial institutions and specialized organizations will participate in the discussions of the Congress.

V international Congress is a unique platform for meetings, exchange of experience and opinions of companies, which activity generates waste production and enterprises for the collection, storage, processing and disposal. The Congress continues a series of events in 2007, 2011, 2012, 2013 and 2015 and 2016.

More than 200 delegates from Russia, Europe, America, Canada, Asia plan to take part in the Congress.

Prepared recommendations will be forwarded to the Administration of Russian President, Russian Government, Federation Council and State Duma of the Federal Assembly of the Russian Federation, to facilitate the formation of a comprehensive system of waste processing in the field of energy, petrochemistry and other industries with hazardous industrial waste.

The organizing Committee of the International Congress "*Environmental security in the energy sector. Technologies and equipment for the collection and recycling of hydrocarbon waste*", invites all organizations which are interested in it to participate in the work of the Congress.
